10th Eucem Conference on Stereochemistry Bürgenstock, May 5 - 11, 1974

President: **Jean-Marie Lehn**

	MONDAY – Moderator: M Simonetta
H B Bürgi	Stereochemistry of reaction paths
D L Bunker	Simple reaction stereochemistry via computer experiments
M Karplus	Structure and function of hemoglobin
E Ruch	Chirality in chemistry
	TUESDAY – Moderator: G Schwarzenbach
R Corriu	New results concerning the mechanism of the nucleophilic substitution on silicon atom
N Kornblum	Substitution and elimination reactions which proceed via radical anion intermediates
M L H Green	Aspects of the use of organo-transition metal compounds as reagents for organic synthesis
	WEDNESDAY – Moderator: K Bloch
J P Changeux	A study on the mode of action of acetyl-choline at the molecular level
W S Johnson	Recent developments in non-enzymic biogenetic-like olefinic cyclization
	THURSDAY – Moderator: J Dale
F Sondheimer	Some aspects of annulene chemistry
P E Eaton	The [n.2.2] propellanes
O Chapman	Low temperature photochemistry
	FRIDAY – Moderator: W N Lipscomb
J R Knowles	A perfect enzyme
R Huber	The trypsin-trypsin inhibitor complex; an example of very strong and specific protein-protein interaction
H Kuhn	A model of selforganization of molecular systems
