11th Eucem Conference on Stereochemistry Bürgenstock, April 27 - May 3, 1975

President: **Johannes Dale**

J Michalski M Schmidt G Ohloff	MONDAY – Moderator: P Laszlo Stereochemical cycles in phosphorus chemistry Structural problems in elemental sulfur and sulfane-derivatives Is there any relationship between odor sensation and stereochemistry?
D A Ramsay A Haaland P Coppens	TUESDAY – Moderator: M Karplus The study of the excited states of molecules by electronic spectroscopy Structure and bonding in organoaluminium compounds Experimental electron densities and chemical bonding
John E Baldwin S Liaøn-Jensen	WEDNESDAY – Moderator: G Snatzke Thermal rearrangements of hydrocarbons Studies on the absolute configuration of carotenoids
C Altona N L Allinger F A L Anet	THURSDAY – Moderator: J Sandström Conformational analysis of nucleic acid constituents Some recent molecular mechanics studies Conformational properties of some six- to sixteen-membered rings
A de Meijere R Scheffold D Ginsburg	FRIDAY – Moderator: A R Battersby Polycyclic hydrocarbons: stereochemical models for structure reactivity relations Porphine-type metal complexes Propellanes
