### 12th Euechem Conference on Stereochemistry Bürgenstock, May 9 - 15, 1976

President: **Alan R Battersby**

---

	MONDAY – Moderator: <b>A Brossi</b>
<b>G W Kirby</b>	The stereochemistry of some microbial transformations
<b>David A. van Dorp</b>	Essential fatty acids and prostaglandins
<b>G Büchi</b>	Synthetic studies on natural products
	TUESDAY – Moderator: <b>R Scheffold</b>
<b>K B Sharpless</b>	Atom transfer oxidations of olefins
<b>G Saucy</b>	Asymmetric reactions applied to the synthesis of $\alpha$ -tocopherol
<b>D Arigoni</b>	Chiral methyl groups revisited
	WEDNESDAY – Moderator: <b>M Anteunis</b>
<b>P Chini</b>	Some problems from the chemistry of the metal cluster carbonyl compounds
<b>K Nakanishi</b>	The structures of some bioactive natural products
	THURSDAY – Moderator: <b>F H Westheimer</b>
<b>M Lazdunski</b>	Molecular aspects of nerve conduction
<b>M Akhtar</b>	Chemical approaches to the elucidation of mechanisms of enzymic reactions: illustrations from the field of natural product biosynthesis
<b>F McCapra</b>	Current problems in bioluminescence
	FRIDAY – Moderator: <b>P Pino</b>
<b>D Seebach</b>	Some regio- and stereochemical aspects in carbanion chemistry
<b>J-H Fuhrhop</b>	Molecular complexes and oxygen adducts of tetrapyrrole pigments
<b>D C Phillips</b>	Studies of the structure and activity of triose phosphate isomerase
