13th Euechem Conference on Stereochemistry Bürgenstock, May 1 - 7, 1977

President: **Piero Pino**
Guest of Honor: **Gerold Schwarzenbach**

	MONDAY – Moderator: J F Bunnett
M Karplus	Theoretical aspects of chemical dynamics
M Szwarc	Electron photoejection and its application in studies of mechanism of <i>cis-trans</i> isomerization induced by electron transfer
P Deslongchamps	Stereoelectronic control in hydrolytic reactions
	TUESDAY – Moderator: R Mason
M Julia	Organic synthesis with sulfones
L M Venanzi	The use of tailor-made ligands for stereochemical study of organometallic reactions
F Calderazzo	Insertion reactions into metal-carbon bonds
	WEDNESDAY – Moderator: A Dreiding
J Halpern	Kinetic and mechanistic aspects of homogeneous catalytic processes
R F Heck	Catalytic reactions of organic halides with alkenes
	THURSDAY – Moderator: H Kagan
H Brunner	"Asymmetric" metal atoms
B Bogdanović	Homogeneous transition metal catalysts in asymmetric synthesis
G W Parshall	Activation of C-H bonds by transition metal complexes
	FRIDAY – Moderator: H A Staab
F G Gault	Reaction mechanisms in heterogeneous catalysis
F Eckstein	Nucleoside phosphorothioates - tools for the investigation of enzymes
T C Bruice	Oxygen activation, electron transfer and dehydrogenations catalyzed by flavins
