15th Eucem Conference on Stereochemistry Bürgenstock, April 29 - May 5, 1979

President: **Sir Derek Barton**
Guest of Honor: **E Havinga**

	MONDAY – Moderator: H A Staab
B Lythgoe	Steric aspects of some synthetic methods
A Marquet	Structure of sulphur stabilised carbanions: stereochemical consequences
C Grob	A stereoelectronic solution to the norbornyl problem
	TUESDAY – Moderator: J Mathieu
W Oppolzer	Stereocontrolled syntheses of ring-systems and natural products
A Fischli	Some aspects of the transfer of chirality
J Martel	Recent advances in the stereocontrolled synthesis of several natural products
	WEDNESDAY – Moderator: E Havinga
D A Evans	Ionophore total synthesis
H Nozaki	Highly selective synthesis with carbenoids
	THURSDAY – Moderator: D Ginsburg
R M Kellogg	The development of synthetic catalysts examples of catalytically active crown ethers
F Vögtle	Stereochemistry and complex formation of molecular cavities and pseudocavities
J E Stoddart	Old crown and new chemistry: stereochemical principles in the design and function of synthetic molecular receptors
	FRIDAY – Moderator: J D Dunitz
M Saunders	The NMR isotopic perturbation method for determining molecular symmetry of carbocations
M Simonetta	Geometrical and electronic structure of bridged annulenes
F A Cotton	Non-wernerian structural chemistry
