2nd Eucchem Conference on Stereochemistry Bürgenstock, May 8 - 14, 1966

President: **Duilio Arigoni**

	MONDAY – Moderator: L J Oosterhoff
J Sicher	Olefin forming eliminations in medium ring compounds: mechanism and stereochemistry
H Felkin	Stereochemistry of some reactions involving allylic Grignard reagents
O Jeger	Photochemisch induzierte Umwandlungen von Carbonyl-Verbindungen
	TUESDAY – Moderator: A Horeau
O Ourisson	Études stéréochimiques en série organo-phosphorée
A Liquori	Stereochemistry of polypeptide chains
Ph S Skell	Chemistry of carbon vapour, C ₃ and C ₁
	WEDNESDAY – Moderator: W Hüchel
G Wilke	Stereochemische Probleme bei der Katalyse mit Hilfe von Übergangsmetallkomplexen
	<i>Group discussion:</i> Fundamental concepts in stereochemistry
	THURSDAY – Moderator: J D Dunitz
O S Mills	Success and failure in the search for carbene complexes
R S Nyholm	The reactivity of coordinated ligands
D Hodgkin	Stereochemical aspects of the structure of vitamin B ₁₂ and related compounds
	FRIDAY – Moderator: Sir Christopher Ingold
H Eggerer	Nucleophilic enzymatic reactions of acetyl-coenzyme A
J A Berson	Memory effects in multiple carbonium ion rearrangement
R B Woodward	The maintenance of orbital symmetry
