25th Euechem Conference on Stereochemistry Bürgenstock, April 30 - May 6, 1989

President: **Rolf Scheffold**
together with all Former Presidents

Guest of Honor: **Vladimir Prelog**

V Balzani	MONDAY – Moderator: J-M Lehn Photochemical molecular devices
A Collet	Moderator: J Jacques The homochiral <i>versus</i> heterochiral packing dilemma
	EVENING: The Bürgenstock conferences on stereochemistry
T Goto	TUESDAY – Moderator: Moderator: D Ollis Metalloanthocyanins and molecular stacking of flavonoids
B Ernst	Moderator: L Ghosez The oviposition-detering pheromone in <i>Rhagoletis cerasi</i>
S E Denmark	Moderator: Sir D Barton The stereochemistry of complexation of aldehydes and acetals with Lewis acids: implications for stereoselection
G A Somorjai	WEDNESDAY – Moderator: J Dunitz The structure of organic monolayers on metal surfaces and their role in catalytic selectivity
P Laszlo	Moderator: J Dale Organic chemistry at interfaces
R R Schrock	THURSDAY – Moderator: P Pino Well-defined alkylidene complexes and their application as catalysts for controlled ring-opening metathesis polymerization
A J L Beckwith	Moderator: M Julia Stereoselectivity in radical rearrangements and related reactions
A Eschenmoser	Moderator: Sir A R Battersby Why not hexosenucleic acids?
U Lindahl	FRIDAY – Moderator: E Winterfeldt Biosynthesis of heparin
J K Barton	Moderator: D Arigoni Targeting DNA sites with metal complexes
E-L Winnacker	Moderator: D Seebach Why does a mouse look a mouse?
