35th Euechem Conference on Stereochemistry Bürgenstock, April 29 - May 5, 2000

President: **Jean François Normant**
Vice-President: **Andrea Vasella**
Guest of Honor: **Henri B Kagan**

Peter Beak	MONDAY Morning Session – Moderator: Javier De Mendoza Regioselective and stereoselective lithiation-substitution reactions: mechanistic pathways and synthetic consequences
Alexandre Alexakis	New developments in chiral diamine chemistry
Koichi Mikami	MONDAY Evening Session – Moderator: Ilan Marek Asymmetric activation in asymmetric catalysis
Angelo Gavezotti	TUESDAY Morning Session – Moderator: Michael E Jung The crystal packing of organic compounds: reality versus computer simulation
Jacques Livage	From glasses to hybrid materials
Andrew B Holmes	TUESDAY Evening Session – Moderator: Gerard Van Koten Seeing polymers in a new light
Peter E Wright	WEDNESDAY Morning Session – Moderator: Fritz Winkler Structure and dynamics in protein folding and macromolecular recognition
J A Katzenellenbogen	Steroid receptors: a nexus between chemistry and biology
André B Charette	THURSDAY Morning Session – Moderator: David Grierson New reagents for the stereoselective cyclopropanation of unfunctionalized olefins
Carsten Bolm	Asymmetric catalysis with and without metals: from small molecules to polymers
Varinder K Aggarwal	THURSDAY Evening Session – Moderator: Marco A Ciufolini Novel catalytic asymmetric processes for epoxidation and related reactions
Max Malacria	FRIDAY Morning Session – Moderator: Siegfried Blechert Highly stereoselective radical and transition metal catalyzed polycyclisation reactions
Eiichi Nakamura	O Copper wherefore art thou Copper? Molecular pictures of organocuprates in action
Scott Rychnovsky	FRIDAY Evening Session – Moderator: Andrea Vasella Stereochemical consequences of radical and cationic reactions
