41st Euechem Conference on Stereochemistry Bürgenstock, April 22-28, 2006

President: **Bernhard Kräutler**
 Vice-President: **Samir Z Zard**
 Guest of Honor: **Albert Eschenmoser**

Peter H Seeberger Antonio R Echavarren	SUNDAY Morning Session – Moderator: Samir Z Zard Synthesis and chemical biology of carbohydrates New organic reactions through catalytic organotransition metal chemistry
Rainer Herges	SUNDAY Evening Session – Moderator: Jay Siegel Aromatics do the twist: Synthesis of the first Moebius-aromatic annulenes
Chad A Mirkin Colin Nuckolls	MONDAY Morning Session – Moderator: Itamar Willner Nanostructures in chemistry and biodiagnostics Recognition, catalysis and electronics from smart surfaces
Hermann E Gaub	MONDAY Evening Session – Moderator: Marcel Mayor Single-molecule force spectroscopy
Don Hilvert Morton Meldal	TUESDAY Morning Session – Moderator: Herbert Waldmann Molecular diversity and catalysis Integrated combinatorial chemistry: Molecular recognition and catalysis
Shengming Ma Ilan Marek	WEDNESDAY Morning Session – Moderator: Scott E Denmark Control of regio- and stereoselectivity in electrophilic addition reaction of allenes New organometallic reactions
Donna G Blackmond	WEDNESDAY Evening Session – Moderator: Alain Krief Kinetic, mechanistic, and theoretical studies of asymmetric organocatalytic transformations
Ronald R Breaker Gerald F Joyce	THURSDAY Morning Session – Moderator: Ronald Micura Genetic control by riboswitches and ribozymes Direct evolution of nucleic acid enzymes
Robert M Stroud	THURSDAY Evening Session – Moderator: Florante A Qiocho A two billion year old tale of membrane transport
