48th Eucchem Conference on Stereochemistry Brunnen, April 28 – May 3, 2013

President: **Luisa De Cola**
 Vice-President: **Antonio M. Echavarren**
 Guest of Honor: **David Reinhoudt**

Michael Grätzel	SUNDAY Evening Session – Moderator: Katharina Fromm Molecular Photovoltaics and Artificial Photosynthesis
Jeffrey Hubbel	MONDAY Morning Session – Moderator: Marco d'Ischia Engineering materials and proteins for modulating cellular responses
Heather Maynard	From Biomimetic Polymers to Smart Polymers for Drug Delivery Applications
Dennis P. Curran	MONDAY Evening Session – Moderator: Scott Denmark Synthesis and analysis of natural product stereoisomer libraries
Michael Krische Véronique Gouverneur	TUESDAY Morning Session – Moderator: Andreas Pfaltz Hydrogen Mediated C-C Bond Formation Fluorine Chemistry: Hot and Cold Recipes
Christoph Weder	TUESDAY Musical Evening – <i>Pilar (vocals), Federico Ferrandina (guitar), Andrea Colella (double bass)</i> WEDNESDAY Morning Session – Moderator: Per-Ola Norrby Stimuli-Responsive Polymers based on Noncovalent Interactions
Gianluca M. Farinola	Smart architectures with photo/electro-active molecules and various biological structures
Huw Davies	WEDNESDAY Evening Session – Moderator: E. Peter Kündig Stereoselective Reactions of Rhodium Carbenes
Nicolas Winssinger	THURSDAY Morning Session – Moderator: Christian Bochet Programming Assemblies in Chemical Biology with Nucleic Acids
Tom Muir	Protein Ligation: An Enabling Technology for Studying Post-translational Modifications
Viola Vogel	THURSDAY Evening Session – Moderator: Donald Hilvert The art of making and breaking a bond
Jun-ichi Yoshida	FRIDAY Morning Session – Moderator: Antonio M. Echavarren Flash Chemistry: organic synthesis that cannot be done in batch
Bruno Chaudret	Organometallic Nanoparticles and what we can do with them
