49th Eucchem Conference on Stereochemistry Brunnen, May 4 – May 9, 2014

President:	Antonio M. Echavarren
Vice-President:	Antonio Togni
Guest of Honor:	Javier De Mendoza

Peter R. Schreiner	SUNDAY Evening Session – Moderator: Paolo Melchiorre Tunneling Control of Chemical Reactions
Christophe Copéret	MONDAY Morning Session – Moderator: Karl-Heinz Altmann Controlled Functionalization of Surfaces: A Molecular Approach towards Catalyst Design and Imaging Technology
Anna Mapp	Synthetic Transcriptional Modulators
Kenichiro Itami	MONDAY Evening Session – Moderator: Antonio Togni Catalysis and C-H Activation for Advanced Biology and Materials Science
Naoto Chatani	TUESDAY Morning Session – Moderator: Cristina Nevado Direct Functionalization of C-H Bonds Utilizing New Chelation System
Marcey Waters	Understanding Recognition of Histone Protein Modifications in Nature and Design
John Porco	TUESDAY Evening Session – Moderator: Masahiro Murakami Chemical Synthesis and Biological Studies of Antitumor Natural Products
Christopher Chang	WEDNESDAY Morning Session – Moderator: Ruth Gschwind Molecular Imaging Approaches To Discovery and Understanding of Chemistry in the Brain
John Sutherland	Origins of Life Systems Chemistry
Armido Studer	WEDNESDAY Musical Evening – <i>Asasello Quartet, Rostislav Kozhevnikov (Violine), Barbara Kuster (Violine), Justyna Sliwa (Viola), Teemu Myöhänen (Cello)</i>
Michelle C. Chang	THURSDAY Morning Session – Moderator: Shuli You Reduction with Organic Reagents - The Electron is a Catalyst
Nazario Martín	Synthetic Biology Approaches to New Chemistry
Jesus Jiménez-Barbero	THURSDAY Evening Session – Moderator: John Murphy Concave-Convex Supramolecular Interactions in Carbon Nanoforms
Matthew S. Sigman	FRIDAY Morning Session – Moderator: Rubén Martín NMR and Molecular Recognition: Carbohydrate-Protein Interactions
	Analyzing and Predicting Selectivity in Asymmetric Catalysis
