### 49<sup>th</sup> Eucchem Conference on Stereochemistry Brunnen, May 4 – May 9, 2014

President: **Antonio M. Echavarren**  
Vice-President: **Antonio Togni**  
Guest of Honor: **Javier De Mendoza**

<b>Peter R. Schreiner</b>	SUNDAY Evening Session – Moderator: <b>Paolo Melchiorre</b> Tunneling Control of Chemical Reactions
<b>Christophe Copéret</b>	MONDAY Morning Session – Moderator: <b>Karl-Heinz Altmann</b> Controlled Functionalization of Surfaces: A Molecular Approach towards Catalyst Design and Imaging Technology
<b>Anna Mapp</b>	Synthetic Transcriptional Modulators
<b>Kenichiro Itami</b>	MONDAY Evening Session – Moderator: <b>Antonio Togni</b> Catalysis and C-H Activation for Advanced Biology and Materials Science
<b>Naoto Chatani</b>	TUESDAY Morning Session – Moderator: <b>Cristina Nevado</b> Direct Functionalization of C-H Bonds Utilizing New Chelation System
<b>Marcey Waters</b>	Understanding Recognition of Histone Protein Modifications in Nature and Design
<b>John Porco</b>	TUESDAY Evening Session – Moderator: <b>Masahiro Murakami</b> Chemical Synthesis and Biological Studies of Antitumor Natural Products
<b>Christopher Chang</b>	WEDNESDAY Morning Session – Moderator: <b>Ruth Gschwind</b> Molecular Imaging Approaches To Discovery and Understanding of Chemistry in the Brain
<b>John Sutherland</b>	Origins of Life Systems Chemistry
<b>Armido Studer</b>	WEDNESDAY <b>Musical Evening</b> – <i>Asasello Quartet, Rostislav Kozhevnikov (Violine), Barbara Kuster (Violine), Justyna Sliwa (Viola), Teemu Myöhänen (Cello)</i>
<b>Michelle C. Chang</b>	THURSDAY Morning Session – Moderator: <b>Shuli You</b> Reduction with Organic Reagents - The Electron is a Catalyst
<b>Nazario Martín</b>	Synthetic Biology Approaches to New Chemistry
<b>Jesus Jiménez-Barbero</b>	THURSDAY Evening Session – Moderator: <b>John Murphy</b> Concave-Convex Supramolecular Interactions in Carbon Nanoforms
<b>Matthew S. Sigman</b>	FRIDAY Morning Session – Moderator: <b>Rubén Martín</b> NMR and Molecular Recognition: Carbohydrate-Protein Interactions
	Analyzing and Predicting Selectivity in Asymmetric Catalysis
