### 7th Euchem Conference on Stereochemistry Bürgenstock, May 2 - 8, 1971

President: **Hans Musso**

---

<b>Jack E Baldwin</b>	MONDAY – Moderator: <b>R H Martin</b>
<b>W Roth</b>	Rearrangements of dipolar species
<b>H E Simmons</b>	Stereochemistry of non-concerted reactions
	Macrocyclic molecules
<b>W Simon</b>	TUESDAY – Moderator: <b>J M Lehn</b>
<b>R Winkler</b>	Alkali cation specificity of biological systems, model compounds and model membranes
<b>M Eigen</b>	Kinetics and mechanisms of alkali ion carriers
	Evolution of biological macromolecules
<b>W H Pirkle</b>	WEDNESDAY – Moderator: <b>J F M Oth</b>
<b>H Fischer</b>	The use of chiral NMR solvents to determine optical purities and absolute configurations
	Chemically induced dynamic nuclear polarization during some thermal and photochemical radical reactions
<b>G Stork</b>	THURSDAY – Moderator: <b>J M Robertson</b>
<b>E Winterfeldt</b>	Epoxynitrile cyclizations and related matters
<b>A Eschenmoser</b>	Stereochemische Aspekte der Geissoschizin Synthese
	The B <sub>12</sub> -problem
<b>J M Conia</b>	FRIDAY – Moderator: <b>G Chiurdoglu</b>
<b>J K Sutherland</b>	Some aspects of the thermal cyclization of unsaturated carbonyl compounds
<b>G Olah</b>	The cyclization of medium ring olefins
	The general concept and new aspects of electrophilic reactions involving carbocations
