8th Eucem Conference on Stereochemistry Bürgenstock, April 30 - May 6, 1972

President: **W David Ollis**
 Guests of Honor: **R Criegee**
T S Stevens

D J Cram I O Sutherland R Huisgen	MONDAY – Moderator: W D Ollis Stereochemistry of ion-pair-reorganisations Ylide rearrangements [2+2] Cycloaddition reactions involving polar intermediates
R J Crawford G L Closs M J S Dewar	TUESDAY – Moderator: A Rassat Azoalkane thermolysis - concerted or nonconcerted reactions Chemically induced dynamic nuclear polarisation as a tool to determine the structure of radicals and to test for unstable intermediates Concertedness and nonconcertedness in the light of molecular orbital theory
H Kloosterziel K Schaffner	WEDNESDAY – Moderator: W R Roth Studies in carbanion chemistry Stereochemistry in photochemical rearrangements
C W Rees B M Trost V Prelog	THURSDAY – Moderator: M Schlosser Reactive intermediates from 1,2,3-triaza-systems Sulfuranes as intermediates in organic reactions The geometrical basis of stereochemistry
R J P Williams E Antonini R Mason	FRIDAY – Moderator: J D Dunitz Oxygenation, oxidation and hydroxylation by metallo-enzymes Conformational aspects of biological reactions associated with the haem proteins Structure and function of nonhaem metalloproteins
