9th Euchem Conference on Stereochemistry Bürgenstock, April 29 - May 5, 1973

President: **Richard H Martin**
Guests of Honor: **Sir Robert Robinson**

	MONDAY – Moderator: J M Lehn
H Wynberg	Spiral spin-offs
W von Philipsborn	The present role of carbon magnetic resonance in structural chemistry
R C D Breslow	Recent studies on conjugated systems
	TUESDAY – Moderator: J D Dunitz
R J Gillespie	Some recent thoughts on the prediction of molecular geometry by the VSEPR theory
L S Bartell	Molecular structures, rigid and nonrigid; some guidelines
O Sinanoglu	Quantum theory of intramolecular forces and potential energy surfaces
	WEDNESDAY – Moderator: G D Mateescu
G Binsch	Time-averaged intensive parameters and molecular energetics in acyclic systems
J Ficini	Recent aspects of ynamine chemistry
	THURSDAY – Moderator: E Havinga
G Schröder	Recent advances in annulene chemistry
J Reisse	The screening constant problem in nuclear magnetic resonance
L J Oosterhoff	Stereochemical inferences from interaction of light and matter
	FRIDAY – Moderator: V Prelog
L Ghosez	Recent studies on polar cycloadditions
H Kagan	Some aspects of asymmetric catalysis by chiral rhodium complexes
A R Battersby	Porphyrins and corrins
